16	51	**38**	120	**60**	190	**82**	259
17	54	**39**	123	**61**	193	**83**	263
18	57	**40**	127	**62**	196	**84**	266
19	60	**41**	130	**63**	199	**85**	269
20	63	**42**	133	**64**	202	**86**	**272**
21	66	**43**	136	**65**	206		
22	70	**44**	139	**66**	209		

How to read it: measure the liquid depth straight down from the surface to the inside bottom of the tank, in inches, and read the gallons beside it. The chart runs to the top of the straight sidewall (86", in red). At the top of the straight sidewall the tank holds about 272 gallons, a little more than its listed 265 gallon capacity.

Above the sidewall: the dome above the straight wall holds more, and the tank may be filled "brim full" with care. That extra volume is not charted.

Accuracy: calculated from the tank's dimensions with a nominal 1/4" wall. PVDF also moves slightly with temperature, and wall thickness varies from tank to tank, so actual volume can differ from this chart by a few percent. The first inch near the bottom corner holds slightly less than shown. Use the chart as a close guide, not for custody transfer or billing.

Dimensions from the Bailiff drawing VTB00265-31.jpg. All dimensions in inches.
