SIGHT GAUGE LEVEL INDICATOR

A sight gauge lets you see the liquid level in your tank at a glance. A clear PVC pipe runs up the outside of the tank and connects to the tank at the top and bottom. The liquid in the pipe stands at the same level as the liquid in the tank.

Ball valves at both connections let you isolate the gauge for cleaning or replacement without draining the tank.

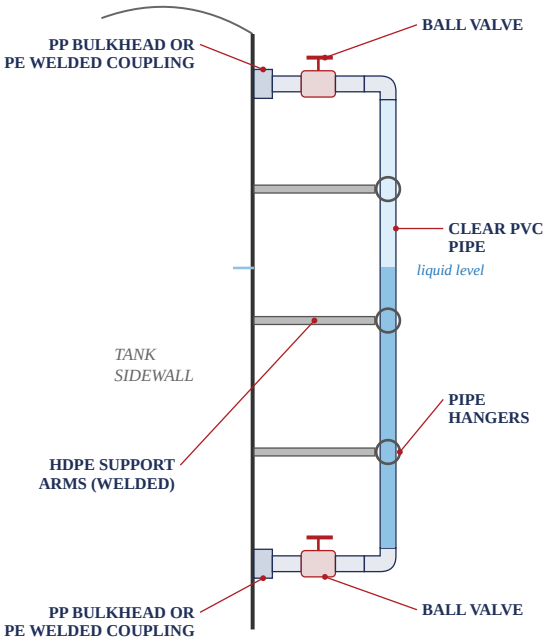

1/2"–3"	Clear PVC
Pipe sizes	Sight tube

COMPONENTS

- **Tank connections:** polypropylene bulkhead or polyethylene welded coupling, top and bottom
- **Valves:** PVC ball valves at each connection
- **Sight tube:** clear PVC pipe and fittings
- **Support:** HDPE arms welded to the tank, with pipe hangers holding the tube

GOOD TO KNOW

- Other sizes and materials are available.
- Check that clear PVC is compatible with your chemical. Ask us about other options for strong acids, solvents or hot liquids.
- Clear PVC can discolor in sunlight over time; the valves make the tube easy to replace.
- Support the gauge with the arms. Do not let its weight hang on the fittings.
