POLYPROPYLENE BULKHEADS

Screw-on POLYPROPYLENE bulkheads offer safe, quick pipe connections for standard wall plastic tanks. We use GreenLeaf Polypropylene bulkheads or their equivalent. They are rated to 150 PSI.

- The bulkheads are double threaded so internal piping or siphon tubes can be easily attached. The bulkheads use Nation Pipe Threads (NPT).
- These bulkheads are available with EPDM, FPM (Viton) or Buna gaskets. Other gasket materials may optionally be sourced.
- Our Polypropylene Bulkheads are available in 1/2", 3/4", 1", 1-1/2" 2", 3" and 4" pipe sizes.
